Milestone Kite - Supported Devices

Prepared by:

Jan Lindeberg, Senior Product Manager, Product Direction

Table of Content

Introduction	3
Disclaimer	3
Revision Information	3
Supported Device List	4

Introduction

Milestone Kite™ supports more than 6,000 different models of IP cameras, sensors, access and other IoT devices. If your IP camera is ONVIF conformant, it will work with Milestone Kite.

If your exact device model is not listed, please contact us and we can verify whether it is supported. In some cases, sub-models or slight variations in models are not listed but still supported by Milestone Kite.

We recommend always using the driver specified for supported IP devices. If you choose to use a universal driver or an unsupported IP device you will be required to purchase one device license per enabled video channel.

Disclaimer

Milestone does not warrant nor accept liability for the Technology Partner's devices and their functionality. Milestone only examines the compatibility or the manufactures' documentation for compatibility with the Milestone XProtect VMS version applied in tests as well as the listed firmware of the device. The use of Milestone drivers downloaded with the Milestone XProtect® Device Pack is governed by the Milestone EULA. Milestone does not warrant nor accept liability for non-Milestone drivers, and your use of non-Milestone drivers is subject to the terms of the licenses defined and provided by the Technology Partners and/or other licensors of the software.

Revision Information

Milestone continuously extends its camera and IoT device support together with its Technology Partners. Please make sure to use the most recent information. The current list of supported devices for Milestone Kite is published on Milestone's website: <https://www.milestonesys.com/support/tools-and-references/supported-devices/>.

Last updated: December 19, 2022.

Milestone Systems is a leading provider of data-driven video technology software in and beyond security that helps the world see how to ensure safety, protect assets, and increase business efficiency. Milestone enables an open platform community that drives collaboration and innovation in the development and use of network video technology, with reliable and scalable solutions that are proven in more than 500,000 customer sites worldwide. Founded in 1998, Milestone is a stand-alone company in the Canon Group.
