Milestone Kite Camera to Cloud Supported Device List	4

Introduction

Milestone Kite™ supports more than 6,000 different ONVIF conformant models of IP cameras, sensors, access and other IoT devices.

The Milestone Kite Camera to Cloud deployment option differs from the Milestone Kite you already know in that it doesn't require the Gateway hardware. This makes it an even simpler and cost-efficient choice for smaller installations. This document provides a list of currently supported devices for the Camera to Cloud deployment.

Disclaimer

Milestone does not warrant nor accept liability for the Technology Partner's devices and their functionality. Milestone only examines the compatibility or the manufactures' documentation for compatibility with the Milestone XProtect VMS version applied in tests as well as the listed firmware of the device. The use of Milestone drivers downloaded with the Milestone XProtect® Device Pack is governed by the Milestone EULA. Milestone does not warrant nor accept liability for non-Milestone drivers, and your use of non-Milestone drivers is subject to the terms of the licenses defined and provided by the Technology Partners and/or other licensors of the software.

Revision Information

Milestone continuously extends its camera and IoT device support together with its Technology Partners. Please make sure to use the most recent information. The current list of supported devices for Milestone Kite is published on Milestone's website: <https://www.milestonesys.com/support/tools-and-references/supported-devices/>.
